TS2

RTR 2WD Electric

Short Course has been in the game for some time and OFNA brought the first 4wd Pro Short Course to the world. Now OFNA opens itself to the 2wd class of SC with the TS2 RTR 2-Wheel Drive Short Course Truck. This RTR brings full race suspension performance just like its big brother PRO Edition. But this truck is ready to go right out of the box giving you the "Plug N Play" to hit the road. This stunning truck features a sharp looking painted body with impressive black mag wheels and deep treaded tires for that fast look. High quality and high strength composite materials provide unmatched durability on the track. Full bearings keep the SC moving freely, a ball differential and slipper clutch keeps the traction in control as they work in harmony with the motor to take on the speed and technical aspects of the tracks. Flexible front, rear and side bumpers provide the bump and run with your competitors as you dice it up for top spot supremacy. The OFNA TS2 RTR will sure offer more to the game and not just a little fun, but a "WHOLE LOTTA FUN!!!"
